**In the year 2024, the world will witness a catastrophic event that will change the course of history forever.**

A massive earthquake will strike the Panama Canal, causing the collapse of the locks and the flooding of the surrounding area. In the chaos that ensues, a fleet of cruise ships will be trapped in the canal, their passengers and crew at the mercy of the raging waters.

Among the survivors is a young woman named Sarah. She is a nurse who was on a cruise with her family when disaster struck. She watched in horror as the ship she was on was torn apart by the earthquake, and she was thrown into the raging waters.

Sarah managed to swim to safety, but she was alone and injured. She wandered through the flooded streets of Panama City, desperate for help. Eventually, she was taken in by a group of survivors who were hiding out in an abandoned building.

Together, the survivors must fight for their lives. They are surrounded by danger, and they must find a way to escape the flooded city before they are killed. But the earthquake has also changed the world, and the survivors must learn to adapt to a new reality.
