

The Delightful and Dangerous Substances That Flow Through Our Lives

We are surrounded by chemicals, both natural and man-made. They are in the air we breathe, the water we drink, and the food we eat. They are in our clothes, our furniture, and our electronic devices. Chemicals make our lives possible, but they can also be dangerous.

In this book, Dr. Sam Kean takes us on a fascinating journey through the world of chemicals, from the mundane to the miraculous. We learn about the chemicals that make our bodies work, the chemicals that make our food taste good, and the chemicals that make our lives more convenient.

We also learn about the dangers of chemicals, from the toxic fumes that can cause cancer to the endocrine disruptors that can interfere with our hormones. Dr. Kean shows us how chemicals can be both a blessing and a

curse, and he helps us understand the risks and benefits of living in a chemical world.

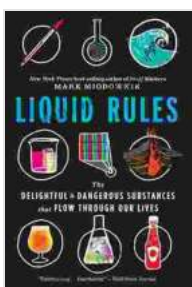

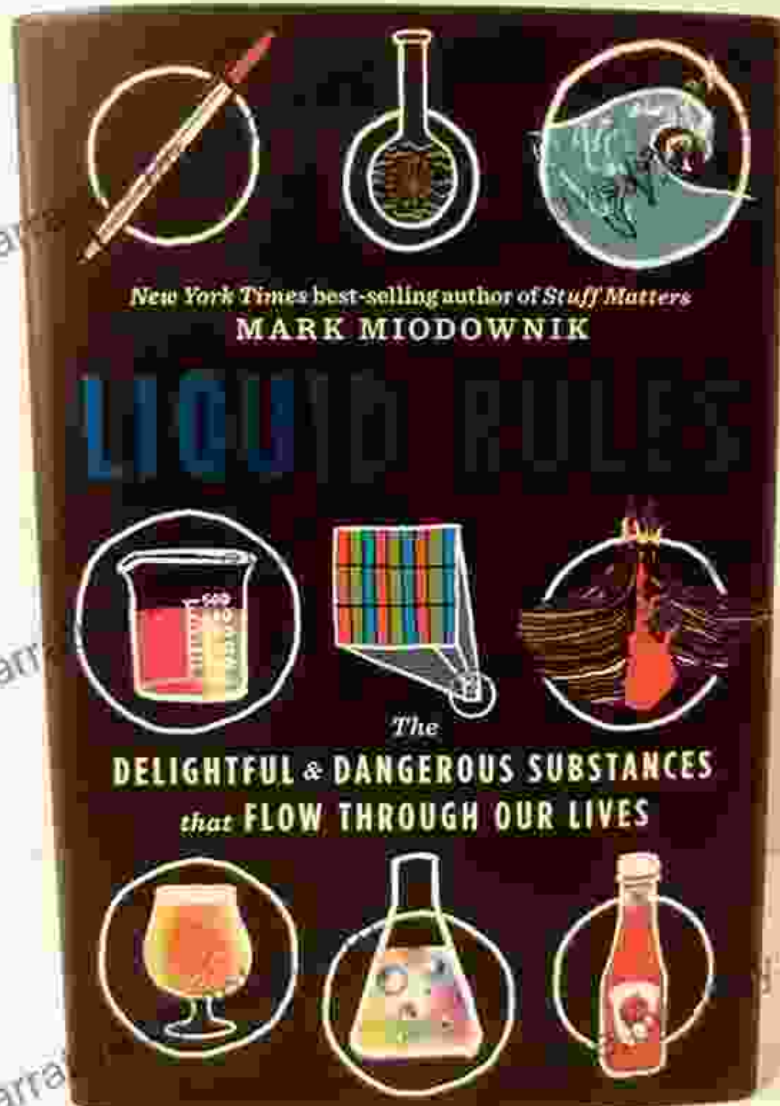

This book is a must-read for anyone who wants to know more about the role of chemicals in our lives. It is a fascinating and informative look at the world around us, and it will leave you with a new appreciation for the power of chemistry.

Here are a few of the fascinating stories that Dr. Kean tells in this book:

- The story of the chemist who discovered the secret to making artificial silk, and how his invention revolutionized the textile industry.
- The story of the scientist who developed a new type of plastic that was both lightweight and durable, and how this plastic became a ubiquitous material in our everyday lives.
- The story of the toxicologist who discovered the link between certain chemicals and cancer, and how her findings led to new regulations that have saved countless lives.

These are just a few of the many stories that Dr. Kean tells in this book. It is a fascinating and informative look at the world around us, and it will leave you with a new appreciation for the power of chemistry.
